VOLTAGE: 10-30 VDC
APPROVALS: IP67/IP69K, ECE R10, RoHS
BRIGHTNESS: 2,000 lm
POWER: 24W, 2A (12V)
COLOR TEMPERATURE: 6,500K REMOTE
BATTERY: A23 (INCLUDED)
WARRANTY: THREE YEAR

ENJOY BRIGHT, SAFE LIGHT EXACTLY WHERE YOU NEED IT

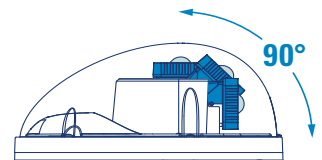

With the touch of a button on the remote, you can easily adjust the output beam from a focused spot to a wide flood, as well as tilt the LEDs a full 90 degrees and perform a continuous 360° horizontal spin. The seamless 360° rotation ensures uninterrupted movement without needing to stop and reset.

HORIZONTAL ROTATION

FULL 90-DEGREE TILT

FEATURES & BENEFITS

- The waterproof and dust-tight design (IP67/IP69K) makes it perfect for utility and construction work
- Automatically returns to home position when powered off
- Provides reverse polarity and short-circuit protection for simplified installation
- The versatile remote control can be used wirelessly with the included A23 battery, or connected with a cable for battery-free installation

PART #	DESCRIPTION
63H91-5	G360 LED REMOTE WORK LAMP WITH REMOTE CONTROL
90041	REPLACEMENT LENS FOR G360 WORK LIGHT
99A00	REPLACEMENT REMOTE FOR G360 WORK LIGHT

FREQUENTLY ASKED QUESTIONS

Is the G360 Remote Work Light waterproof?

Yes, the G360 lamp's unique dome protects it from wind, snow, rain, dirt and dust that cause failure and downtime with other lamps on the market. Our lamp has ingress protection ratings of IP67 and IP69K.

How far can you use the remote from the light?

Operating distance for the remote is 30M or 98.4 feet from the lamp.

Does the dome get hot enough to melt snow?

Dome gets warm when operating the light in warmer temperatures. But outside in cold weather or climates the temperature generated would be negligible. However, the smooth domed surface is easy to clear and most of snow would fall off when a vehicle moves.

Does our lamp have the highest lumen output on the market?

Lumen output from competitive lamps vary, but some higher-end versions have output that goes all the way up to 7000 lumens. The important thing to remember is that our output is precise, not just in location, but also in beam pattern. Other lamps "waste" their output by flooding it into space where work is not taking place. Our lamp can put 2000 effective lumens of bright, safe light exactly where the operator needs it.

Can you use the remote control both plugged in and wirelessly?

Yes, when plugged in the remote operates the lamp, and doesn't even require a battery. When the operator wants to be outside of the vehicle, the remote control has a switch that turns on the wireless mode. Simply complete the quick pairing/matching process and you can wirelessly use the remote up to 30m/98.4ft away.

Is the lamp multi-volt?

Yes, the lamp operates from 10-30V meaning they can be installed on vehicles operating with either a 12 volt DC or 24 volt DC system.

Can I buy replacement domes in case something hits it and cracks it?

Yes, we offer two service parts for the G360 LED Remote Work Lamp. The replacement lens is part number 90041, and the replacement remote control is part number 99A00.

Does it come in retail friendly packaging?

Yes, it comes ready for the showroom in a full color box, featuring informative graphics and tri-lingual text designed for the North American market.

Does it come with a warranty?

Yes, the G360 LED Remote Work Light offers customers a three year limited warranty.

Why does the lamp come with two different gaskets?

The lamp has two different gaskets to accommodate different mounting situations, like slightly sloped roofs compared to a perfectly flat mounting bracket. It also allows you to have some adjustability relative to the bolt depth.
